

KalFos

Natural Phosphate Fertiliser

Rich in phosphate, calcium and trace elements

Key

Nutrients

Typical values

- Calcium (CaO) 37%
- Phosphate (P₂O₅) 21%
- Potash (K₂O) 4%
- Magnesium (Mg) 1%
- Sodium (Na) 5%
- Sulphur (SO₃) 4%
- Copper (Cu) 100mg/kg
- Zinc (Zn) 400mg/kg
- Selenium (Se) 3mg/kg
- Cobalt (Co) 3mg/kg
- Manganese (Mn) 150mg/kg
- Boron (B) 70mg/kg
- Neutralising Value 20%

Benefits

- Ideal pre-germination
- High in Phosphate and Calcium
- Slow release nutrients
- Available in bulk or 1 tonne tote bags by special request

KalFos is suitable for use in arable and grassland systems as a direct replacement for costly manufactured fertilisers, saving you money.

KalFos is rich in key nutrients such as phosphate and calcium, to help maximise your crops' growth potential.

Low cost and the ability to supply **KalFos** in bulk or bags makes **KalFos** the sustainable choice for your farming system.

Typical application rate of 1 tonne/ha will provide up to 210kg P₂O₅, 40kg K₂O and 40kg SO₃ dependant on soil conditions and cropping

KalFos can be used as a fertiliser without Environment Agency or Animal Health restrictions.

KalFos is a by-product from the production of renewable energy using biomass materials.
